

Integration Developer

Don't just find a job. Feel it.

You'll play a vital role in enabling seamless system connectivity and data flow, ensuring the organisation can deliver efficient, reliable, and scalable digital services.

Connect with what you'll do

In the role you'll:

- ▶ Lead the design, development and support of secure, scalable integration solutions connecting internal and external systems.
- ▶ Own integration delivery from requirements through to deployment, support and continual improvement.
- ▶ Design, build and maintain APIs and integration services using Microsoft Azure Integration Services, .NET/C# and SQL.
- ▶ Produce and maintain high-quality technical documentation, including Low-Level Designs (LLDs), API specifications, data mappings and configurations.
- ▶ Own and maintain the organisation's Integration Catalogue, ensuring all integrations are accurately documented, governed and kept up to date throughout their lifecycle.
- ▶ Define and champion best practices across integration development, code quality, documentation, security, automated testing and CI/CD.
- ▶ Work collaboratively with Business Analysts, Quality Assurance teams, stakeholders and third-party suppliers to design and deliver robust, high-quality solutions.
- ▶ Provide technical leadership, mentor colleagues, support workload planning and ensure delivery against agreed priorities.
- ▶ Take a big-picture view by considering dependencies, downstream impacts, business processes and future technology strategy, proactively identifying risks and opportunities.
- ▶ Build strong relationships, communicate complex technical concepts clearly to both technical and non-technical audiences, and contribute to a culture of collaboration, innovation and continuous improvement.

Connect with how you'll do it

We're looking for someone with experience of:

- ▶ Proven experience in a senior software development or integration development role.
- ▶ Strong experience with Microsoft Azure Integration Services, REST/SOAP APIs, .NET/C# and SQL.
- ▶ Experience designing and delivering enterprise integration solutions using modern integration patterns and best practices.
- ▶ Experience working within Agile delivery environments, with knowledge of CI/CD, automated testing and secure software development.
- ▶ Strong analytical, troubleshooting and problem-solving skills.
- ▶ Experience working with business stakeholders, technical teams and third-party suppliers, with the ability to influence and communicate effectively at all levels.
- ▶ Experience mentoring developers and providing technical leadership.

It'd blow us away if you had:

- ▶ Experience with cloud integration platforms (e.g. Azure Integration Services)
- ▶ Experience working in the social housing sector · Exposure to CI/CD pipelines and automated testing in integration environments
- ▶ Understanding of data governance and data architecture principles

The key behaviours we expect in the role include:

- ▶ Take ownership, show resilience and deliver high-quality solutions with sound technical judgement.
- ▶ Think strategically, considering the wider technology landscape, dependencies and the long-term impact of integration decisions.
- ▶ Act with integrity, build trusted relationships and collaborate effectively across Technology and the wider business.
- ▶ Stay organised, adaptable and curious, continually looking for ways to improve our integration capability.
- ▶ Deliver on commitments, resolve issues proactively and communicate confidently with both technical and non-technical audiences.
